SUMMARY

I'm a motivated and detail-oriented learner with a strong interest in technology and problem-solving. I enjoy working on real-world projects where I can build reliable web applications and improve my skills through hands-on practice. I have experience with React/Next.js, REST API integration, and implementing secure authentication systems like JWT. I'm adaptable, responsible, and focused on delivering clean, high-quality work while continuously learning and growing.

EDUCATION

2022 - 2025	Bachelor of Computer Science and Engineering
Daffodil International University,Asulia,Dhaka	CGPA: 3.33 Focused on strengthening core programming skills, software development.
2017 - 2020	Higher Secondary Certificate (HSC)
Rashidozzhoha Sorkari Mohila College,Sirajganj	Result:GPA 5.00 Completed Higher Secondary studies in Science with strong analytical and understanding.
2015 - 2017	Secondary School Certificate (SSC)
Sabuj Kanan School And College,Sirajganj	Result: GPA 5.00 Built a solid academic foundation with growing interest in science, logic, and modern technology.

RESPONSIBILITIES

- Developed scalable backend services using Node.js, following clean architecture practices.
- Built modern and responsive user interfaces using React.js and Next.js.
- Designed and integrated RESTful APIs along with third-party service integrations.
- Worked on database design and managed application state using Redux.
- Implemented secure authentication and authorization using JWT and OAuth2.
- Identified and fixed bugs, optimized performance, and improved overall system stability.
- Implemented real-time features using WebSocket and handled async operations efficiently.

SKILLS

- | | | | |
|--------------|-----------------------|------------------------------|-----------|
| • JavaScript | • React | • Next.js | • Angular |
| • Sql | • Front-End Developer | • Analytical Problem Solving | |

ACHIEVEMENTS

- Best Library Award(Spring 2025) – Recognized for outstanding contribution in library activities at DIU.
- 11th IEEE Accepted paper (2025) – Paper title “RosLightNet: A Lightweight DCNN Framework for Automated Rose Leaf Disease Classification with Interpretable Visual Explanations”
